

Advantech Wireless Revolutionary New VSAT Product Line

Montreal, Canada, June 14, 2012 — Advantech Wireless, a Canadian-based manufacturer of Satellite, RF Equipment and Microwave Systems has developed a revolutionary VSAT product line-up starting with the smallest, most fully-featured, lowest-cost hub in the world, the Discovery 100, the midrange Discovery 200 offering support for up to 1500 terminals and finally the most powerful Hub in the world, the Discovery 300 providing full capacity and support for thousands of terminals. These next generation designs have been optimized for performance and reliability, with remote upgrade capabilities via software key as increased features are needed. Customers can purchase these products today with the confidence of knowing that they are based on Advantech Wireless' 20 years of proven field technology.

Advantech Wireless, the company that built the world's first DVB-RCS system, has responded to market demands by developing a new, powerful and highly flexible system designed to minimize the cost of upgrading and capable of meeting the functional and performance requirements of the most demanding system configurations. The Discovery Series is a new platform for VSAT Hub features to ensure longevity and guards against obsolescence.

David Gelerman, CEO of Advantech Wireless will be appearing at the upcoming CommunicAsia 2012 trade show in Singapore. He will personally discuss the latest advances in this amazing product line-up. Guests can learn, see and touch the Discovery Hub 100 which includes powerful standard features and easy software selectable upgrades to enable customers to increase capacity with their demand thereby minimizing CAPEX and OPEX with the ability to upgrade in an instant.

Whether you need to service 10, 1000 or 10,000 – Advantech Wireless has the best solution. Mature technology, field-proven, remotely-upgradeable in an instant – That's Advantech Wireless' revolutionary line of VSAT Hubs!

About Advantech Wireless

Advantech Wireless, an ISO 9001: 2008 certified corporation, is shaping the world with leading-edge wireless broadband communications. Since 1988, Advantech Wireless manufactures and deploys networking solutions for broadband connectivity, broadcast solutions and backhaul requirements using satellite and terrestrial wireless communications. Products include: Terrestrial Microwave Radios, Antenna Controllers, Deployable Antennas, SSPA's, Block-up Converters, Frequency Converters, Satellite Modems and VSAT (DVB-RCS) Hubs & Terminals.
